### Premium Sound with Hybrid Active Noise Cancellation

## Metz presents new Bluetooth® headphones KH-BT 04 for long-lasting listening enjoyment

**Zirndorf, 26. März 2026** - Metz Consumer Electronics stands for high-quality entertainment electronics with German brand expertise and a clear focus on quality, functionality, and sophisticated design. With a broad portfolio of TV sets and audio accessories, the company develops products that combine modern technology with durable craftsmanship and high quality standards.

With the upgrade of the Bluetooth® headphones KH-BT 04, Metz is optimizing its audio portfolio with a powerful model featuring Hybrid Active Noise Cancellation, the latest Bluetooth® 5.4 technology, and an impressive battery life of up to 60 hours.

#### State-of-the-art Bluetooth® technology for outstanding sound quality

The new Metz KH-BT 04 is equipped with the latest Bluetooth® 5.4 standard and supports all common audio codecs. This enables high-resolution audio transmission while maintaining a stable and energy-efficient connection.

With a frequency range of 20 Hz to 20 kHz via Bluetooth® and even 20 Hz to 40 kHz in AUX mode, the 40 mm drivers deliver a detailed, dynamic sound profile with powerful bass and clear highs.

#### Hybrid Active Noise Cancellation - silence at the touch of a button

The integrated Hybrid Active Noise Cancellation (ANC) reduces ambient noise by  $\geq 35$  dB in the range from 30 Hz to 600 Hz. This effectively minimizes low-frequency disturbances—such as those in airplanes, trains, or open-plan offices. In addition, the integrated noise reduction during calls ensures clear voice transmission.

#### Long-lasting battery for extended listening sessions

With a capacity of 800 mAh, the KH-BT 04 offers exceptional runtimes:

- Up to 60 hours of music playback and talk time (ANC off)
- Up to 40 hours with ANC activated
- 250 hours of standby time

A full charge is conveniently completed via USB-C in just 1.5 hours.

## Comfort and smart features

Support for common Bluetooth® profiles ensures high-quality audio streaming, convenient control, and reliable telephony, enabling versatile use with smartphones, tablets, or notebooks. A stable connection with a range of up to 10 meters ensures reliable everyday use.

The closed over-ear design provides a high level of comfort even during long listening sessions, thanks to an ergonomic, flexibly adjustable silicone headband and soft, adaptive memory foam ear cushions.

Operation is conveniently handled via integrated buttons directly on the earcup. Thanks to its foldable design including a carrying case, the headphones are also a practical companion on the go.

## Price and availability

*Recommended retail price for Germany and Austria:*  
Metz Bluetooth® headphones KH-BT 04: **€199.00**
